Experiences

Friday Finance 2021-04-26 (Actual)

I've begin my career here as a front-end developer, utilizing Cypress and Vue.js 3. Over time, I did expanded my skills to be a full-stack developer with Node and Postgres. Currently, I'm at a Tech Lead position.

Doc88 6 months

I have experience working as a senior developer in a front-end team, where I made architectural decisions on how to delivery/deploy Vue.js code and legacy jQuery code in the same monolithic application.

Boxnet 1 year and 1 month

Before, I worked at boxnet as an outsourcer for Coddera and I was hired to continue the work; I've worked with front-end focusing on Vue, giving maintenance and creating new features, made some small adjustments in a legacy application in angular, refactored the app to a react native version, realized some node services on AWS and GCP and interacted with whats app business api

Coddera 10 months

Creating a project from scratch in vue.js, defining apis architecture, deploys, testing, analytics and integrations using some AWS tools, cognito, lambdas, api gateway.

Athos 1 year and 4 months

Expertise in front end development of WebApps applications. Participation in the development of improvements and maintenance of the webapp App App my adm. Creation of custom skins of the webminio condominium management system. Creating responsive hotsites using mobile-first.

About me

Graduated in Systems Analysis and Development by FATEC São Caetano do Sul, I developed some projects in PHP but I deepened in the front end area, applying in my work: SPA, performance, responsive design, mobile first, offline first.

I currently work with Vue.js, GraphQL, Nuxt, Node and Postgres stack at | My last job was with Vue.js, GraphQL, Nuxt, Node and Postgres stack at Doc88

On some weekends I work as a DJ, enjoying the party, making my work a hobby.
