Experiences

Doc88 2019-09-02 (Actual)
Working as front dev (Vue/Nuxt)

Boxnet 1 year and 1 month
Before, I worked at boxnet as an outsourcer for Coddera and I was hired to continue the work; I've worked with front-end focusing on Vue, giving maintenance and creating new features, made some small adjustments in a legacy application in angular, refactored the app to a react native version, realized some node services on AWS and GCP and interacted with whats app business api

Coddera 10 months
Creating a project from scratch in vue.js, defining apis architecture, deploys, testing, analytics and integrations using some AWS tools, cognito, lambdas, api gateway.

Athos 1 year and 4 months
Expertise in front end development of WebApps applications. Participation in the development of improvements and maintenance of the webapp App App my adm. Creation of custom skins of the webminio condominium management system. Creating responsive hotsites using mobile-first.

CGM SP 6 months
Creation of Excel / VBA programs for handling and reporting to the transparency portal.

Vanzoline 1 year and 2 months
Support for correspondence course, intranet network configuration, proxy and ip.

Skills

Vue Node.js Cypress GraphQL Laravel Firebase Javascript es6+ Stylus Git SEO Scrum Agile Jasmine Jest PHP Python Go

About me

Graduated in Systems Analysis and Development by FATEC São Caetano do Sul, I developed some projects in PHP but I deepened in the front end area, applying in my work: SPA, performance, responsive design, mobile first, offline first.

I currently work with Vue.js and AWS stack at Boxnet

On some weekends I work as a DJ, enjoying the party, making my work a hobby.
